

TRANSPORTATION PROCEDURE

NWOSSC 114

SECTION 100 GENERAL

114 HAZARDS

Statement and Rationale

The Northwestern Ontario Student Services Consortium will consider hazard designations, related to transportation eligibility, when the attributes of the geographic area would typically alter the way a community uses the area and where it would not be reasonable to expect pedestrian movement.

Procedure

The General Manager is responsible for the designation of hazard areas.

Hazard designations are reviewed periodically and may be removed or implemented as conditions change.

Temporary hazard areas may be established in construction zones, flooded areas or any other circumstances that the General Manager deems appropriate.
